

Bio for Joshua Crumbaugh

Joshua Crumbaugh is one of the world's leading security awareness experts and *internationally renowned* cybersecurity speaker. He is the developer of the Human Security Assurance Maturity Model (HumanSAMB) and Chief Hacker at PeopleSec. He is also an expert social engineer who has talked his way into bank vaults, Fortune 500 data centers, corporate offices, restricted areas of casinos and more. His experiences highlighted a significant need for a better "human solution" -- This led him to a passion in social engineering and better-understanding ways to stop social engineering attacks.
